## Make an arch

**This activity has been designed for children from 6 to 16 years old.**

The type of paper will affect the colour quality, and thicker card or paper will last longer.

**To make the arch you will need:**

- scissors
- craft knife
- glue
- ruler

### 1. **Cut out the blocks**

Younger children may need help with this stage.

### 2. **Score the fold lines**

Score lightly along the black lines and fold. Make sure you do not cut right through.

### 3. **Glue the flaps**

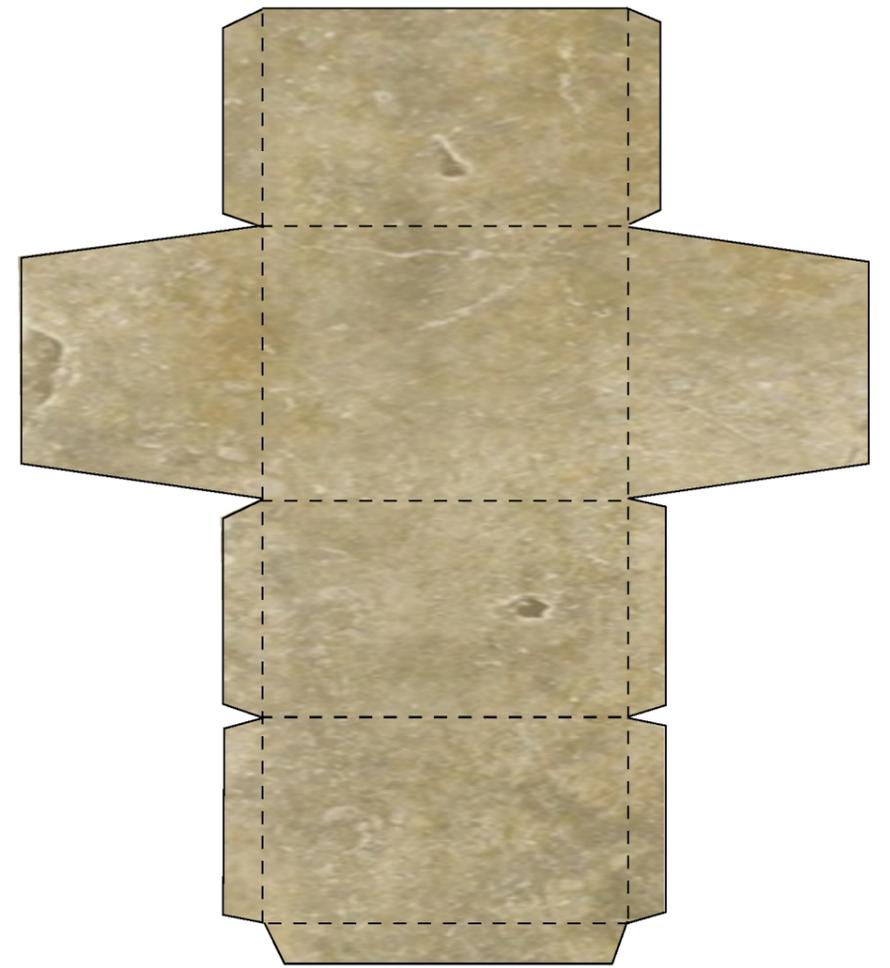

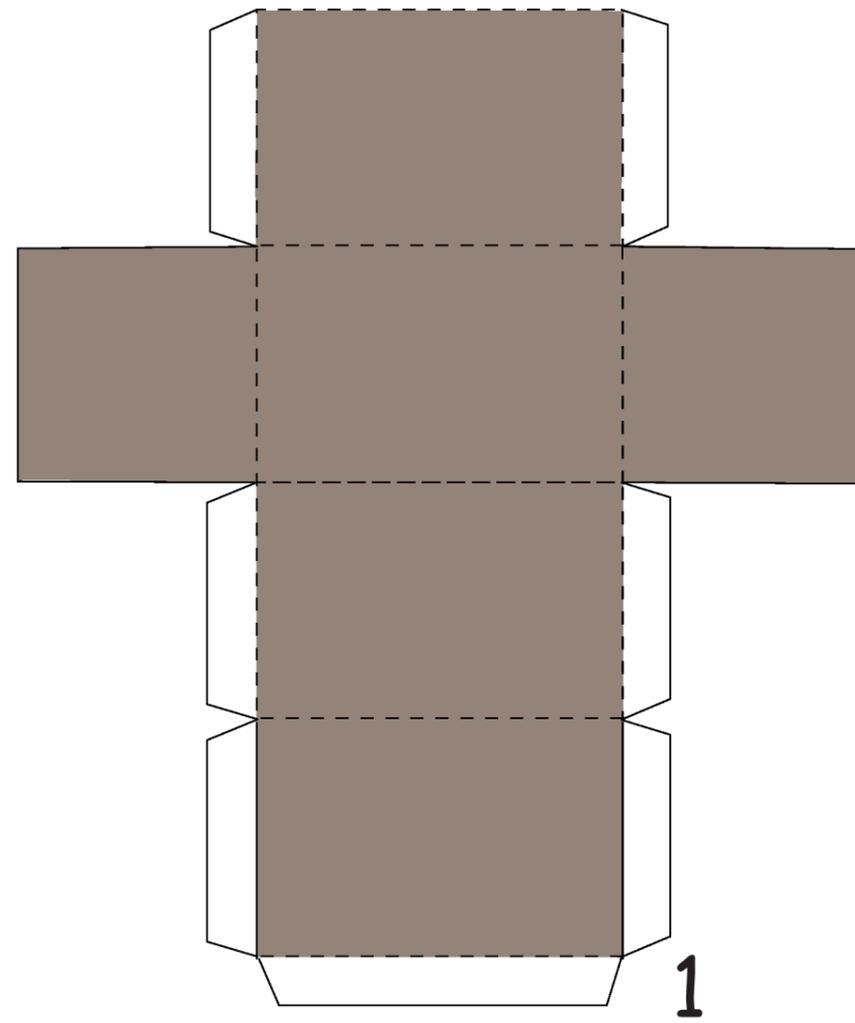

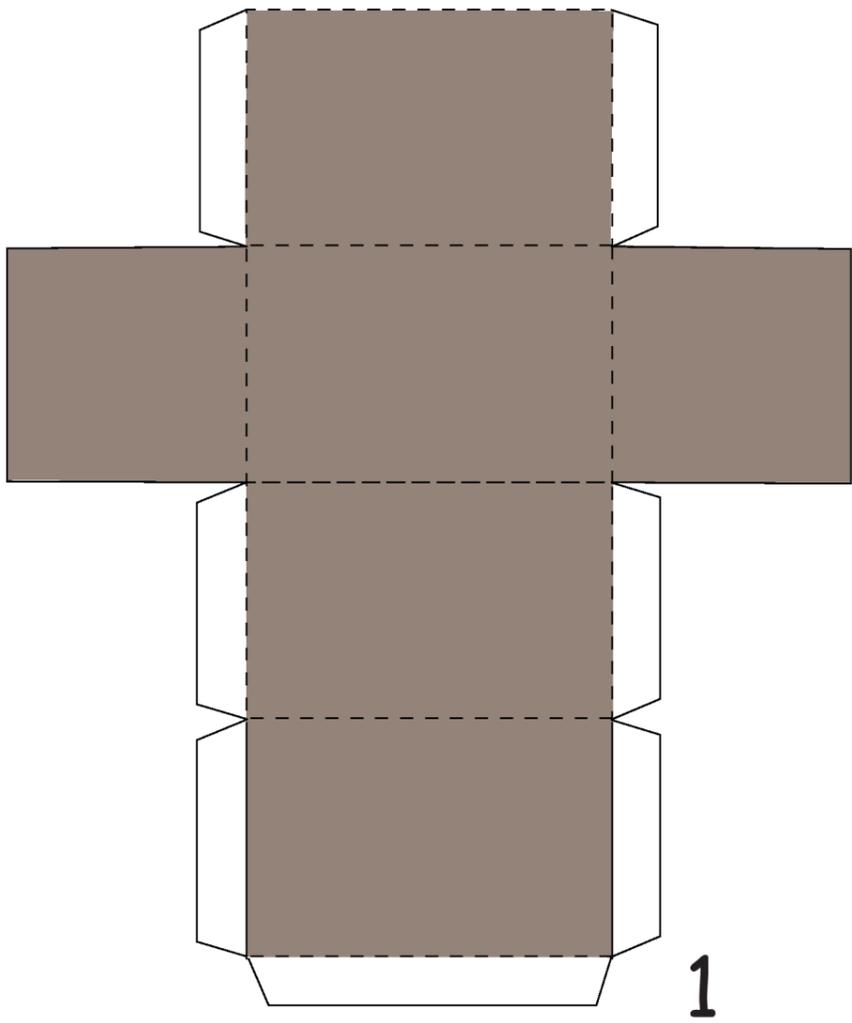

Put glue on the white flaps and fold the pieces into shape. Leave to dry.

### 3. **Build the arch**

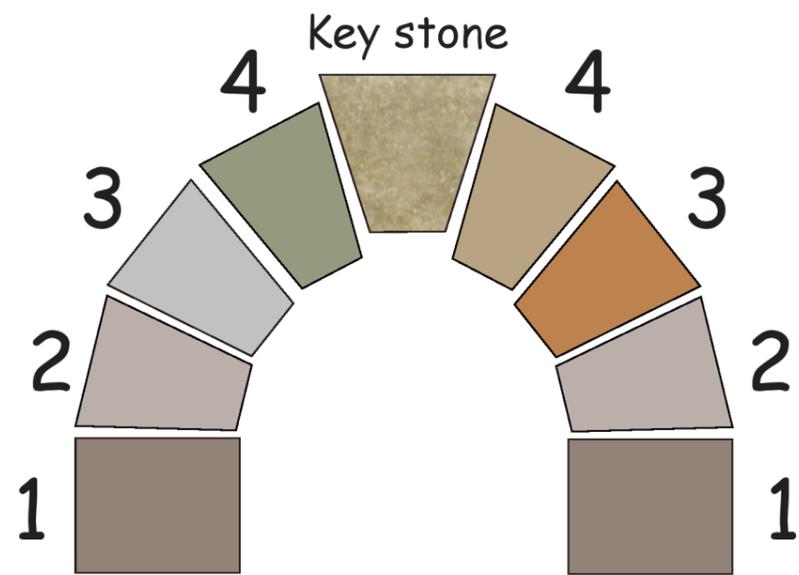

Put the blocks on top of each other in order with the key stone last. See how important the key stone is to construction.

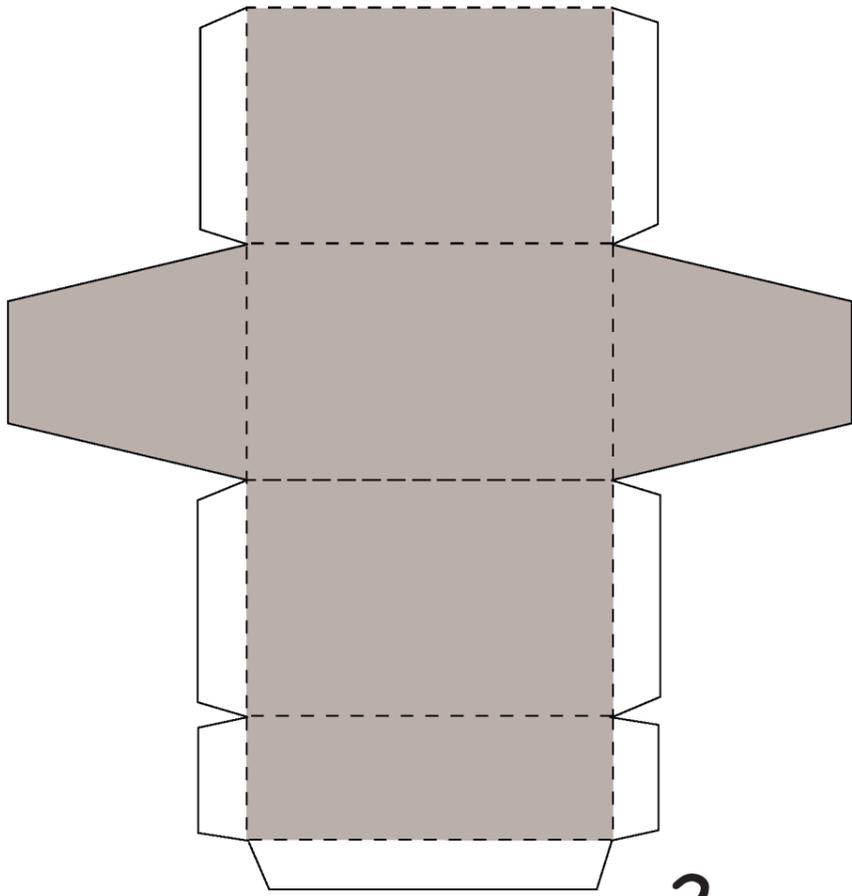

### 4. **Set the scene**

Cut out the pebbles, grass and greenery and position around your arch.
